

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

*Influenza (la grippe).—Continued.*

*Chicago, Ill.*—During the week ended January 28, 43 certificates of death were returned to the office of the commissioner of health, giving influenza or la grippe and its complications as the cause of death, viz, 12 to uncomplicated influenza and 31 to influenza as the cause, complicated with other affections, chiefly pneumonia.

*Elizabeth City, N. C.*—Influenza prevails in a mild form. No deaths.

*Newport, R. I.*—La grippe has been prevalent during the past seven or eight weeks. The type is mild in comparison with that reported from some other cities, and there is no mortality.

*Pensacola, Fla.*—La grippe is prevalent in mild form. The death rate is very low. The treatment is symptomatic.
